

Mariann Szücs

Frontend developer

Experienced frontend developer with 5+ years of expertise in creating scalable, data-driven web applications. I thrive in environments that offer flexibility, autonomy, and the freedom to focus on delivering high-quality solutions. With a strong technical foundation in Angular and TypeScript, and additional experience with Elm and Tailwind CSS, I excel at building responsive and maintainable applications. Currently seeking a remote position within the EU that values independent problem-solving and high-impact contributions.

SKILLS

- **Frontend Technologies:** Angular (8–17), TypeScript, JavaScript, HTML5, CSS3, RxJS, NGXS, Tailwind CSS, Elm.
- **Testing & Tools:** Cypress, Jest, Highcharts.
- **UI/UX Collaboration:** Figma, Miro.
- **Backend Integration:** RESTful APIs.
- **Project Management:** Git, Bitbucket, Microsoft DevOps, Jira.
- **Languages:** English, Danish, Hungarian.

EXPERIENCE

Unik System Design, Vejle, Denmark *Frontend developer*

May 2023 – Feb 2025

- Designed and maintained complex web applications using Angular 16 and 17 in a micro-frontend architecture.
- Conducted code reviews and implemented e2e tests with Cypress to ensure high-quality, maintainable code.
- Developed responsive, cross-browser compatible designs to enhance user experiences.
- Collaborated with backend developers to integrate RESTful APIs for seamless data flow.
- Optimized application performance for maximum speed and scalability.

Vejle, Denmark

SkySpecs, Vejle, Denmark

Frontend developer

April 2022 – April 2023

- Developed dashboards and summaries for AI models using Elm and Tailwind CSS.
- Maintained and expanded an internal component library, focusing on clean and reusable UI components.
- Improved application performance and enhanced user experiences through optimization techniques.
- Worked closely with internal AI engineers to align designs and functionality with technical requirements.

Schneider Electric, Kolding, Denmark

Frontend developer

April 2019 – April 2022

- Designed and developed interactive dashboards and data visualizations for network operations using TypeScript, JavaScript, HTML, CSS, and Highcharts.
- Integrated RESTful APIs to create dynamic, data-driven solutions.
- Implemented comprehensive unit tests with Jest to ensure stability and reliability of code.

EDUCATION

Aalborg University, Esbjerg, Denmark

Bachelor and Master of Science in Multimedia Design

July, 2018

- Specialized in creating software prototypes for user-centered design projects.
- Conducted and reported on UX research.
